

Reviewing Your Lab Results

Last Updated Tuesday, 05 February 2008

This page contains directions for reviewing your lab results using the patient portal.

First you need to browse to the patient portal login screen

You will first see the disclaimer page. Click "I agree" to continue.

Next you will see the first of several demographics screens. If you have changes to make, you can do so. Otherwise click "skip".

Finally, you will be brought to the Patient Portal Main Page. In the left menu bar, click on "Lab results"

This will bring up the main lab result page. Lab results will only appear here once they have been resultated and reviewed by Dr. Morris.

Clicking the name of a laboraotry will bring up the result.
